Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) A lighting device, ~~which comprises~~
comprising:

a light emission surface;

~~and~~ a plurality of substantially point-shaped light
sources; and

~~which is characterized by an optical waveguide plate (1)~~
into which a plurality of cavities ~~(20)~~ is provided, each
cavity ~~(20)~~ accommodating a light source ~~(21)~~, which cavities
each comprise an upper side ~~(203)~~ facing the light emission
surface ~~(11)~~ and side walls ~~(201)~~, said upper side ~~(203)~~ being
covered with a first reflecting layer ~~(204)~~, while the coupling
of the light into the optical waveguide plate takes place
through the side walls ~~(201)~~.

2. (Currently amended) ~~A~~ The lighting device ~~as claimed~~
~~in of~~ claim 1, ~~characterized in that wherein~~ the side walls
~~(201)~~ of the cavities ~~(20)~~ are substantially perpendicular to
the light emission surface ~~(11)~~, and the upper sides ~~(203)~~ of
the cavities ~~(20)~~ are substantially parallel to the light
emission surface ~~(11)~~.

3. (Currently amended) ~~A~~ The lighting device ~~as claimed~~
~~in of~~ claim 1, ~~characterized in that wherein~~ the cavities ~~(20)~~
are each covered with a second reflecting layer ~~(121)~~ on their
lower side opposite to their upper side ~~(203)~~.

4. (Currently amended) ~~A-The lighting device as claimed in of claim 1, characterized in that wherein the cavities (20)~~ are substantially cylindrical in shape.

5. (Currently amended) ~~A-The lighting device as claimed in of claim 1, characterized in that wherein the cavities (20)~~ are provided in the lower side ~~(12)~~ of the optical waveguide plate ~~(1)~~.

6. (Currently amended) ~~A-The lighting device as claimed in of claim 1, characterized in that wherein the light sources (21)~~ are light-emitting diodes.

7. (Currently amended) ~~A-The lighting device as claimed in of claim 3, characterized in that wherein the second reflecting layer (121)~~ extends over the side faces ~~(13 to 16)~~ and the lower side ~~(12)~~ of the optical waveguide plate ~~(1)~~.

8. (Currently amended) ~~A-The lighting device as claimed in of claim 7, characterized in that wherein the second reflecting layer (121)~~ is at a distance from the optical waveguide plate ~~(1)~~, which distance constitutes an air gap.

9. (Currently amended) ~~A-The lighting device as claimed in of claim 1, characterized in that wherein the first reflecting layer (204)~~ extends further in horizontal direction with a first portion ~~(204a)~~ into the optical waveguide plate ~~(1)~~.

10. (Currently amended) A The lighting device ~~as claimed~~
~~in of~~ claim 1, ~~characterized in that wherein~~ the first
reflecting layer ~~(204)~~ extends further with a second portion
~~(204b)~~ along the side walls ~~(201)~~ of the cavity ~~(20)~~.

11. (Currently amended) A The lighting device ~~as claimed~~
~~in of~~ claim 1, ~~characterized in that wherein~~ the edges of the
cavities ~~(20)~~ situated opposite the upper side ~~(203)~~ are
surrounded by a ~~third~~ another reflecting layer ~~(205)~~.

12. (Currently amended) A liquid crystal display device
~~with a~~ incorporating the lighting device ~~as claimed in of~~
claim 1.
